Professional Summary

Fullstack Developer with hands-on experience building RESTful APIs and web applications using ASP.NET Core, Angular, and SQL Server. Quick to adopt new technologies such as Java Spring Boot, React and modern DevOps tools.

Technical Skills

Web: NodeJs, ASP.NET, Angular, Golang, RESTful APIs, TypeScript, C#,
Databases: SQL Server, PostgreSQL, MySQL, Redis, Entity Framework Core
Fundamentals: OOP, SOLID, REST, HTML5, CSS3
Tools & DevOps: Git, GitHub, Docker, Kafka

Experience

FTI SAI GON Joint Stock Jun 2025 – May 2026
Software Engineer

- Developed and maintained full-stack web application features using Angular, TypeScript, ASP.NET Core, Golang, and SQL Server; designed RESTful Web APIs and reusable frontend components to support business workflows and improve usability and maintainability.
- Collaborated with Business Analysts, QA, DevOps, and other developers in Agile/Scrum ceremonies to clarify requirements, conduct code reviews, and troubleshoot production issues. Wrote unit tests and supported integration testing to ensure coding standards and deliver optimized, maintainable solutions.

ECLO Co., Ltd Feb 2025 – Apr 2025
Intern Software Engineer

- Built **CMS** web application modules with JavaScript, HTML, and CSS, enabling non-technical users to manage website layout and content independently, reducing developer dependency for routine changes.
- Collaborated with team members to clarify project requirements, identify suitable technical solutions, and improve delivery efficiency.

Projects

Origin Leather Craft | *ASP.NET, Angular 21, SQL Server, Kafka, MinIO* Oct 2026

- Architected an idempotency mechanism to completely eliminate duplicate order creation from network retries and replay cached snapshots with sub-millisecond response times.
- Improved backend throughput with targeted composite indexes, eliminated N+1 and Cartesian explosion issues, and deployed a rate limiter to protect against DoS and thread pool exhaustion.
- Integrated Kafka for non-blocking API responses under heavy load, enabling event-driven communication between services and improving scalability. Auto-generated multi-size images to reduce bandwidth and speed up page loads across devices.

Human Resources Management | *Go, Angular 18, SQL Server* Aug 2025

- Maintained and developed new Web API features for the HRM system, improving response time from 6s to 2s, while preserving data accuracy.
- Collaborated with team members to identify bottlenecks, troubleshoot issues, and implement optimized solutions.
- Reviewed and refactored existing API endpoints to improve code maintainability and align with RESTful design standards, reducing technical debt in the codebase.

Pilot Management System | *Go, Angular 18, SQL Server* Jun 2025

- Built and maintained REST Web APIs and Angular frontend features serving 500+ users, ensuring performance, availability, and data accuracy.
- Improved system performance through query optimization, indexing, and Redis caching.
- Integrated a finance-related application to enable secure data transfer between systems, improving workflow efficiency.
- Integrated the SmartCA digital signature system to enhance security and ensure data legality.

Education

Sai Gon University Sep 2021 – Mar 2026
Bachelor's Degree in Information Technology *GPA:* ***8.39/10.00***

TOEIC LR: **930/990** — **TOEIC SW**: **310/400**
