

NGUYEN HUY HOANG

 github.com/hnoga-n  hnoga.com  hoanghuynghuy711@gmail.com  0961814002

EDUCATION

Sai Gon University Sep 2021 – Jan 2026
Bachelor of Engineering in Information Technology GPA: 3.34/4
TOEIC LR: Listening 495, Reading 435, Overall 930/990 Mar 2025
TOEIC SW: Speaking 140, Writing 170, Overall 310/400 Oct 2025

SKILLS

Programming Languages: JavaScript, Java, C#, Go
Frameworks: Angular, Spring Framework, Next.js, ASP.NET Core
Libraries / Tools: React, Bootstrap 5, PrimeNG, GORM, Prisma

EXPERIENCE

FTI Joint Stock Co. Jun 2025 – Present
Software Engineer
Develop backend services using Spring Boot with a focus on performance and scalability, capable of handling high request volumes. Build modular and dynamic user interfaces using Angular, applying component-based architecture and data binding to improve maintainability and user experience in enterprise systems.

PROJECTS

- **Pilot Management System** — Angular 18, PrimeNG, Go, SQL Server Jun 2025
Integrated SmartCA digital signature system to enhance security and ensure data integrity for operational orders. Implemented ship plan statistics across configurable time ranges using optimized multi-table queries while maintaining system performance. Developed a logging mechanism to track user activities for auditing and analytical purposes.
- **Central Replishment System** — Angular 21, Spring Framework, Postgresql Jan 2026
Designed and developed an automated distribution system to allocate goods from warehouses to retail stores based on each store's sales performance. Implemented a flexible, fine-grained role-based access control mechanism, enabling permission assignment down to individual functionalities while ensuring data security and access integrity. Built a user-friendly and intuitive interface to enhance usability and operational efficiency.
- **FTI Sai Gon Website** — React, Go, Sql server Sep 2025
Optimized website SEO to improve search engine ranking and visibility. Designed a modern, visually appealing user interface with a strong focus on user experience for the company's official website. Developed a content management system enabling users to create and edit specific content pages, allowing continuous updates of the latest information. Implemented a multilingual architecture to expand global reach and attract international customers.
- **Social Media Ninstagram** — ASP.NET Core, Next.js, Material UI, SQL Server Aug 2024
Designed database schema and entity relationships using Entity Framework. Developed authentication and authorization APIs including account locking and password recovery. Implemented friend recommendation logic based on mutual followers. Repository: github.com/vihao1802/Social-Media-Server.git
- **Eclo Website** — PHP, Bootstrap 5, VvwebJs, MySQL Apr 2025
Built image upload and gallery selection feature. Developed About and Expert page UI. Implemented a drag-and-drop CMS allowing administrators to manage website content and layout dynamically. Repository: github.com/hnoga-n/folio.git
